Foreword

Sanghamitra English version completed an year with all your blessings and good wishes. We completed another exciting year of Srinivasa Ramanujan Mathematrix Club and concluded the program with Medhavadhanam 2008. Koumudi (an online monthly magazine) published an article about Medhavadhanam, which describes *the motivation to start the program, the milestones reached, goals of the organization etc.* A review was published in India post released on August 15th. See NRI Page for Medhavadhanam 2008 review.

Thanks for encouraging mails. Received lots of mails about the cover page, NRI Page, Kids' pages and Salutation to your solution etc. Sanghamitra is looking for committed volunteers in the areas of writing articles related to festivals, about noted personalities, any public events and also proof reading. If you wish to extend your hand, please send mail to

“Story time for everyone” program was successful with 8 members, 4 kids and 4 adults. Some stories were re-narrated based on the kids imagination. Many friends requested to organize this kind of activities throughout the year rather than only during summer. But, we strongly feel these programs go well when the kids are in playful mood. With the academic activities at school, they may not be able to express to their capability.

We are planning to conduct Mathematrix Club in other parts of US during Winter and Spring break to share the knowledge and looking for interested volunteers to share the information within their community. Working out the statistics and availability. We will bring this information to your notice in next issue. Thanks for all your interest and support. Thanks to those who sent mails and enquiries about Vedic mathematics classes.

Let us meet again in the next issue due in January.

-Sanghamitra Team.

Importance of Dussehra.

Vijayadasami also known as Dussehra is a festival celebrated on the tenth day of the bright half of the Hindu month of Ashwiyuja. It is the grand culmination of the 10-day annual festival of Dasara or Navaratri and is celebrated the victory of the forces of Good over Evil. It is also considered to be an auspicious day to begin new things in life. In South India Vijayadasami commemorates the legend in which the Goddess Durga, also known as Mahishasura Mardini or Chamundeshwari, vanquishes the demon Mahishasura. People believe that the event have taken place in the vicinity of Mysore in Karnataka. In Northern India, the festival commemorates the victory of Sri. Rama, prince of Ayodhya in present day Uttar pradesh, over Ravana, the ruler of Lanka.

There is another belief from Mahabharata, during the 1 year of exile at Virata King's kingdom, Pandavas kept their divine & distinctive weapons on a Shami tree. When Duryodhan's army tried to capture the cattle of Virat king thinking Pandavas were in the kingdom of Virat, Arjun went and collected his weapon from the Shami tree and won the war on Kauravas.

It is believed that any activity started on this day will be successful. Kids pray goddess Saraswati seeking blessings to achieve knowledge. Merchants pray goddess Lakshmi seeking her blessings to achieve profits. Ladies pray goddess Gouri seeking her blessings to achieve blissful life to their family members. On this day most of the people decorate and offer puja to the instruments earning them food. For example, a tailor offer puja to his sewing machine, a driver offer puja to his truck or car, a farmer offers puja to his cart, axe, tractor etc. In the name Vijaya Dasami, 'Vijaya' means win. Dasami means 10th day of the moons cycle. Vijaya Dasami is celebrated on the 10th day after new moon in the month of Ashwiyuja.

In villages, the kids used to have holidays for about 2 weeks, during which they used to serve the needy people and by which they used to learn to contribute to the society. Now-a-days that culture is fading and the kids are after studies all the time. They are not being encouraged to build public relations and social activities. We should bring that rich culture for a peaceful world.

Let us all wish for a peaceful world!

- SuSri.

Medhavadhanam 2008

Srinivasa Ramanujan Mathematrix Club (organized by Sanghamitra, a non profit organization) presented 'Medhavadhanam 2008' on August 2nd, 2008 at Thornhill Library Auditorium from 1 P.M. to 4 P.M. Fourteen participants from Five years to 15

Chief guest Shri Siddhesvari (Didiji)

years of age amazed over 100 audiences. Shri Siddhesvari devi (Didiji), founder of Radha Madhav Society, a branch of Jagatguru Kripalu Parishat, was the chief guest for the function, shared few words of wisdom with the audience and blessed the kids by presenting them certificates. She gave very valuable message to kids as well as adults to build their character and live with values. She narrated stories of Sri Krishna and kids enjoyed listening those stories.

Participants of 'Medhavadhanam 2008'

Srinivasa Ramanujan Mathematrix Club organizes classes every summer for two months, during which it shares knowledge including some vedic mathematics, problem solving techniques. Medhavadhanam is a presentation of the participants followed by award ceremony. Various topics include 5th root of a number, Cube root of a number,

remainder when a given number is divided by 9, Five row addition, Sum of 10 Fibonacci sequenced numbers, 3×3 matrix solving, 4×4 matrix solving, computing the day of the week given date, month & year, computing recurring decimals for fractions like $1/29$, $1/59$, $1/89$ etc, framing 12 digit number divisible by 13, square of a number and many more. Audiences were curious to know how the decimal places were told for given

fraction, solving 4×4 matrix. There were lots of questions to find the day of the week for a given date, month and year. All the above questions were answered within a minute without using paper, pen or any computing aid.

Sreenivasa Rao Ainapurapu explaining about the Mathematrixs Club→

Sanghamitra donated the amount collected during Srinivasa Ramanujan Mathematrixs club to Didiji for Jagatguru Kripalu hospitals serving many people in remote villages.

Finally Sreenivasa Rao Ainapurapu, who organized Srinivasa Ramanujan Mathematrixs Club, explained one technique from Vedic mathematics as a bonus for the attendees. He expressed his gratitude to one and all that made this event possible. Sanghamitra is contributing an online quarterly magazine (located at

Audience getting ready for the program

<http://www.sanghamitra.org>). It is also supporting many families back in India by providing food, cloths, blankets, books and other needs.

Savitha Baragada (8th grade), Sravya Ainapurapu (5th grade), Upagya Kompalli (8th grade), Rucha Shukla (9th grade), Tanvi Kadiyala (4th grade), Hargobind Vohra (5th grade), Namaswi Paladugu (5th grade), Vineeth Merugumala (6th grade) and Sannitha Baragada (5th grade) participated from senior kids group. They answered fifth root of a number, cube root & square of a number, product of a given number and 11, framing a 6 digit number divisible by 11, given the difference of squares of two consecutive numbers – telling the numbers, five row addition, 3 x 3 matrix solving, computing the sum of 10 Fibonacci sequenced numbers and divisibility by 9 respectively.

Sruthi Ainapurapu (2nd grade), Bhavya Perma (1st grade), Deepa Shukla (3rd grade), Sohan Kandadi (3rd grade) and Ajay Makkena (4th grade) participated from Junior kids group. First three of the kids told the chosen number from 1 through 31, provided they tell the cards having their chosen number. Other two kids manipulated the missing number given 3 digits out of the 4 digits found by subtracting the sum of digits of a chosen 4 digit number from the 4 digit number itself.

Audience curiously involved in the program

Sreenivas took the items of solving 4 x 4 matrix, telling the recurring decimals of a given fraction (denominator ending with 9), telling day given the Date, Month and Year and framing a 12 digit number divisible by 13. He explained the kind of techniques shared during Srinivasa Ramanujan Mathematricks Club and gave a couple of examples to audience. Many audiences were thrilled and said that they look forward for next summer program.

*

Gold is tested for purity, but not the iron. Similarly a talented person is subjected to tests!

Worry Vs. Stomach

- Ateeth.

What is worry? Where is it generated? Why is it generated? What are the consequences of it? How to get rid of it?

Worry is a feeling generated which is meaningless and worsen the situation rather than helping the person in worry. It is mental uneasiness caused due to some event happened. Sometimes it is developed anticipating trouble. Many of us do not know that worry starts from stomach. Worrying does not solve the problem. Because of worrying we can utilize our ability fully. It blocks our caliber. The best way to get rid of it is by letting the things happen. It is not so easy as it is said. But practice makes men perfect!

We always express saying “my stomach got upset!”, “My stomach is churning!”, “My stomach burning!” responding to the different scenarios. We use these phrases, but we do not know the inner meaning. For example, if one of our colleagues gets appreciation from boss, we start worrying about our job, we worry about not getting appreciation from boss, sometimes even start hating our colleague – which spoils the spirit. We should change our attitude in such a way that wherever we see something appreciable, we should appreciate it no matter what the consequences are. Some times we say “Don’t hit on my stomach”, if someone is taking away our earnings.

Stomach is having one of the energy centers called “Manipuraka” (Navel center) which means ‘The City of Jewels’. We can think of Lanka, a beautiful city, which was ruled by king Ravana. Similarly we are also kings of beautiful city ‘Manipuraka’. We heard that Ravana had a pot with nectar in his stomach. That was what attacked by Rama, leading to Ravana’s death. When we chant Pranavam, we need to originate it from Nabhi (Navel) region. In Chinese literature also they say this energy by name ‘Chi energy’.

If we analyze, we can understand one thing. Our stomach (Manipuraka) area is the origin for worry. Because of different kind of emotions, we feel them at stomach first. If we are jealous about a person, it is reflected in the form of burning sensation in stomach. If we see something unbearable, we feel our stomach churning. Most of the emotions like anger, jealousy, greed are originated at stomach. We should accept the things as they are rather than opposing them. Even if we oppose, we can not change. If a river is flowing with high speed, it is foolish to go against its flow. You might get washed away. We can watch the flow from a distance. Similarly if we try to witness our thoughts, we can see the clarity about our worries.

(With blessings of my spiritual masters.)

Love in Thought is Truth
Love in Action is Dharma
Love in Experience is Santhi
Love in Understanding is Ahimsa

Smile if you wish

March!

Teacher: Students, let us learn the names of months today. Are you ready?

Students: Yes, Sir!

Teacher: January, February. Repeat.

Students: January, February.

Teacher: March...

Students started going out in line.

Teacher: ??? ☹

Me too!

Two candidates attended an interview. Both of them scored same marks in written test and the employer selected one of them.

Candidate: Sir, we both scored the same marks in written test.

Employer: Yes. That is right.

Candidate: So, what made you reject my candidature?

Employer: It is simple. For one of the questions, he answered "I don't know".

Candidate: So?

Employer: For which, you answered "Me either!"

Candidate: ☹

Sunday Newspaper!

A newspaper reader calls paper boy and (with angry voice) asks him why he didn't deliver news paper.

Paper boy: Madam I delivered news paper well before 6:30 A.M.

Reader: I couldn't find Sunday special issue? What happened to it? You never deliver paper on time.

Paper boy: How can you see tomorrows paper today itself? Today is Saturday!

Reader: Oh! That is why there is no one at church in the morning!

Paper boy: ☹

Apple - Onion!

Two friends are having fun and one of them said.

Ravi: Raju! Do you know? Eating an apple everyday is healthy.

Raju: Yes! That is why they say "An apple a day, keeps the doctor away!"

Ravi: Similarly Onion also helps us.

Raju: An onion a day keeps everyone away!

Ravi: ☹

Steps

Teacher : What steps do you take when you are chased by a bull?

Student : BIG steps!

Teacher : ☹

Let us see some more jokes in next issue. Till then, Good Bye.

Salutation to your solution!

- Sudhakar Attili.

1. Mohan's birthday is on February 29th. Do you know the importance of this day? Yes! That day comes once in every 4 years (during leap year). On a particular year his birthday came on Wednesday. After how many years does he celebrate his birthday on Wednesday again?
2. If 1A99B is divisible by 36, find the values of A & B.
3. (a) There are 4 different shapes having same perimeter namely a Circle, Pentagon, Triangle and a Square. Can you figure out the order having largest area to smallest area? (b) If the areas of the four shapes namely Square, Triangle, Circle and Pentagon are same, tell the sequence of the shapes in the order of their perimeter from largest to smallest.
4. There are 720 students in a school. 45% of them like Mathematics, 60% like Science, 70% like Social studies. 15% like both Mathematics and Science. 35% like both Science and Social studies. 20% like both Mathematics and Social studies. 5% like all the three subjects. Can you find how many of the students like (i) only Mathematics? (ii) only Science? (iii) only Social studies? (iv) How many of them don't like any one of the subjects?
5. There is a building 160 ft high. One person dropped an article from the top. At the same time another person from the foot of the building shot that object with a gun vertically upside with a velocity of 128ft/sec. If the acceleration due to gravity is 32ft/sec², when and where do the bullet and object meet? Assume both the persons are of same height.

Do you know?

If you take 2 apples from a basket having 10, how many apples do you have?

You will have only two, which you picked.

Kids' Corner

- Sudhakar Attli.

[A story by Bhagawan Sri. Satya Sai Baba]

The Barber Shop

not exist."

"How can you say that?" Asked the surprised barber.

"I am here, and I am a barber. And I just worked on you!"

"No!" the customer exclaimed. "Barbers don't exist because if they did, there would be no people with dirty long hair and untrimmed beards, like that man outside."

"Ah, but barbers do exist! That's what happens when people do not come to me."

"Exactly!" affirmed the customer. "That's the point! God, too, does exist! Because people do not look to God for help is why there's so much pain and suffering in the world."

Bhagawan Baba explains this whole problem as a simple lack of awareness of who we truly are. He says:

"When anyone asks you, 'Can you show me God?' You should reply 'You are God; that is why you are able to talk and act.' To know divinity, you should know the sacredness within you. Keeping salt in your mouth, you can not taste anything sweet. Only by rinsing your mouth and getting rid of the salt can you taste sweetness. Worldly desires are like salt. Discard them; then you can realize divinity."

A man went to a barber shop to have his hair cut and his beard trimmed. As the barber began to work, they began to have a good conversation and talked about many subjects. When they eventually touched on the subject of God, the barber said, "I don't believe that God exists."

"Why do you say that?" asked the customer.

"Well, you just have to go out in the street to realize that God doesn't exist. Tell me, if God exists, would there be so many sick people? Would there be abandoned children?"

"If God existed, there would be neither suffering nor pain. I can't imagine a loving God, who would allow all of these things."

The customer thought for a moment, but didn't respond because he didn't want to start an argument. The barber finished his job and the customer left the shop.

Just after he left the barber shop, he saw a man in the street with long stringy hair and an untrimmed beard; he was looking dirty and unkempt.

The customer turned back and entered the barber shop again and said to the barber, "You know what? Barbers do

Cross Word for kids

Across : 1. One of the fundamental value.

Opposite to lie. (5)

6. A **dot** without a vowel. Abbreviation of 'Desk Top'. (2)

8. A greeting in Hawaii. Jumbled! (5)

9. Abbreviation of 'Artificial Intelligence'. (2)

10. Statement of what can or should or must be done in a game. Still some countries have king's ---- (4)

11. Not a ball point pen, --- pen. A liquid. (3)

12. Take no notice of. 'I' missing. Ending with 'raw metal'. (5)

14. Abbreviation of 'Computer Science'. (2)

15. Train the mind. Make someone learn. (7)

17. Abbreviation for 'Post Office'. (2)

19. Tell someone to leave. (2)

20. A bird, ends with a word described by 'people or things in a line'. (4)

22. A character from Ramayan, who went in search of Sita, made Rama happy by giving Sita's news. Jumbled. (4)

Down :

1. Object or mark to be hit in shooting etc. (6)

2. Circular. (5)

3. First two characters of each of the words 'Ultimate', 'Love', 'Umbrella', 'Omkar'. (8)

4. Bring into existence. Upside down and no letter is repeated! Jumbled 'React'. (5)

5. Abbreviation for 'His highness'. (2)

6. Move with rhythmical steps and gestures. Tap, Bharatanatyam, Kathak etc. (5)

7. Short Parody. Down to top. (4)

13. A fruit. First letter moved to the middle. (5)

16. Past tense of Tear. (4)

18. Belonging to oneself or itself. (3)

19. Abbreviation of Georgia, US state. (2)

21. Common in between 'spout' and 'Joule'. (2)

Can you find the word?

1. This is a 7 character word, a

person to remember after mother and father.

2. This word starts with a drink made of leaves (three characters).

3. This word ends with a pronoun representing a feminine, 3rd person, singular (3 characters).

4. 3rd, 4th, 5th and 6th characters in sequence form a word for pain.

Tricky question - Smart Answer

How do you read

?

Answer: Ball + Point + Pen, which is Ball point pen.

2. Sravya Ainapurapu, St. Louis.

Salutation to your solution! - Answers

1. 99.

Solution: For finding winner, 99 players should loose the match. Each one of them should paly atleast one match to loose. So 99 matches are required to decide the winner.

2. **Solution:** The gardener takes 5ft stick and measures three times to get 15ft long rope. He then takes out 7ft using 7ft stick. Now he is left with 8ft.

3. 119.

Solution: To start with, let us take the condition 'when divided by 5 gives a reminder 4. So the number should be of kind 14, 24, 34 etc. or 19, 29, 39 etc. But the number when divided by 2 gives a reminder 1. So the number should be of the form 19, 29, 39 etc. But the number is divisible by 7. So the set of valid numbers are 49, 119 etc. This number when divided by 3 should give a reminder 2. So 119 is the right answer.

4. 23 sweets.

Solution: We need to solve this problem starting from backwards. There are 2 sweets left. Suresh took half of the previously left over sweets and a half sweet. So he took 3 sweets, leaving 2 sweets. All together 5. Now Naresh took 6, left 5. So there were 11 sweets. Ramesh took 12 and left 11. So, there were 23 sweets.

5. 961.

Solution: Square root of 961 is 31. Square root of (reversed number 961) 169 is 13. Here 31 can be obtained by reversing 13.

Return good for evil

*For a bowl of water give a goodly meal;
For a kindly greeting bow thou down with zeal;
For a simple penny pay thou back with gold;
If thy life be rescued, life do not withhold;
Thus the words and actions of the wise regard;
Every little service tenfold they reward.
But the truly noble know all men as one,
And return with gladness good for evil done.*

(A Gujarati didactic stanza, taken from 'The story of my experiments with truth' by M.K.Gandhi.)

Concluding word

Dear readers,

Sanghamitra proudly entered into second year & wishes you all a happy, prosperous, healthy and blissful Dussehra. We are so happy that we are receiving many letters from you asking for new articles and more number of pages. That is acceptable, but we need to work little hard to do that. We will try to bring more articles in near future to win your heart. We request you to send articles either a science article, news article, about culture or anything that you think is useful for the readers. Send any articles or your feedback to .

Some of you wrote letters asking to announce some gifts for 'Question Gallery', 'Salutation to your Solution', 'Kids' Xword', 'Can you find the word' etc. This is tough at this moment. But if someone sponsors those gifts, we will certainly consider that. Send your answers before December 15th either by E-mail or Postal mail. Encourage your kids to do Kids' Xword and other challenges. Tell your friends about Sanghamitra.

Note : Answers should be sent on or before **December 15th**.
